The application stores email messages on your computer in the most efficient way. The messages are stored on a database, and this helps to eliminate the problems with size and delivery. Just like with email messages, data can be stored in different categories and access can be granted to specific users, with limited access control to keep your mailbox safe. A new kind of software available online at a reasonable price. It can be used as a household assistant, for example, as a phone book, or address book, calendar, memo, task, and even browser and FTP program. Mikrosoft Outlook 2007 - a powerful program that manages your appointments, contacts, mail, tasks, memos and other essential data. With it you can send emails with a calendar for quick replies to the right time. You can also use online passwords, or fill in the fields for automatic configuration of Internet browser. What's more, with the help of this program you can: 1. Collect and save address book, email messages, contacts, web pages, memos and other information. 2. Add pictures to documents. 3. Print or email documents. 4. Send or receive files from remote FTP servers and use them with your own Web server. 5. Open images and save to database. 6. Fill in the fields automatically for Internet browser. It also has a mini Internet browser. In addition to this, you can send the mail directly from Internet Explorer. This application lets you manage multiple accounts and send mail from them. It allows you to manage your email accounts on your mobile phones as well. Manage multiple accounts There are three categories in the main menu, among which there are 4 submenus. The first one shows a list of accounts that you use, so you can see the information about your accounts and the possibility to log in. The second submenu offers you the option to control the accounts. If you want to view a single account, choose it from the list, and then press the LOG IN button. If you want to work with more accounts simultaneously, choose the "send all at once" option. While you are on the main menu, you can see the Internet and select whether it will be used as the default page, save it in the favorites list, and add it to the bookmarks. You can also do all of that from the menu that appears if you click the menu key, or if you are in the "info" mode, you can use
