

Match 3 Pirates! Heir to Davy Jones is a fast-paced Match 3 puzzle game where up to four pirates must use the special abilities of Davy Jones in order to stop a sinister plot. Every game of Match 3 Pirates! Heir to Davy Jones is a fresh start, with five unique game modes which can be played individually, or in hardcore local, online and mobile multiplayer across multiple platforms. Players can create their own game boards, and play on three difficulty settings. The Match 3 games utilise a board of 26 unique tiles which are split into several layers. The objective of the game is to use the special tile and move the pirate characters around the board to collect matching sets of tiles. The player must match 5 tiles in a row to move the characters to the next space, and continue this process until the board is completed. Match 3 Pirates! Heir to Davy Jones is similar to the classic puzzle game Sokoban, as players move the characters up, down and left and right within the board in order to create the required path from one tile to another. The tiles and characters in Match 3 Pirates! Heir to Davy Jones each have special powers: the tiles can either be bombs, which destroy all tiles they land on, or are blocking tiles, which prevent any movement forward. The pirates have special abilities which can be utilised to help the player and prevent the board being filled with bombs. Match 3 Pirates! Heir to Davy Jones features 5 unique game modes, including Local Multiplayer, Online Multiplayer and mobile touch controls. Match 3 Pirates! Heir to Davy Jones is available for Android™, iPad®, iPhone® and iPod touch®. Check out the sequel of this game here: Match 3 Pirates! Match Three! The perfect soundtrack for your motorcycle cruises. If you plan to wreck some robots along the way - just tune in! This score includes all the tracks in Steel Rats composed by Arkadiusz Reikowski (Observer, Kholat, Layers of Fear) and Tomasz Pauszek.Feature of game: • All the tracks in Steel Rats • Additional 60 minutes of gameplay in Full Flash Version • Purchase The Original Soundtrack • Features this high quality full orchestral soundtrack • The hard-disk version contains all the tracks recorded in HD qualityQ: Grouped Network based on two integers I have this ugly NSDictionary: [{text : "abc", id : 516}, {text : "abc", id : 517}, {text : "abc", id : 518}, {text : "abc", id : 519}, {text : "abc", id : 520}, {text : "abc", id : 521}, {text : "abc", id : 522}] I need to group it by text values and add some additional attributes: grouped: [{text : "abc", id : 516}, {text : "abc", id : 517}, {text : "abc", id : 518}, {text : "abc", id : 519}, {text : "abc", id : 520}, {text : "abc", id : 521}] With the additional attributes to each element [id, step] : a: 516 -> [step: 516, id: 516] b: 517 -> [step: 517, id: 517] . . . Another issue is also the id: if id has multiple 516 i need to add a1, b2 etc as a string so they will be: a1: 516 -> [step: 516, id: 516, a: 516] b2: 517 -> [step: 517, id: 517, b: 517] . . . If anyone can help me that would be great. A: for (int k = 0; k

kruis The Kristallijnkruis ("crystallin cross") is a visual icon that symbolizes the Dutch language and that appeared on Dutch currency from 1966 to 2000, when the National Bank of the Netherlands discontinued the production and circulation of currency. For the first time the crystallin kruis appeared on legal tender in May 1966, on the 5 guilder note. It would also appear on Dutch scrip until it was withdrawn from circulation on August 1, 2000, when after the introduction of the euro. Etymology It's certainly one of the most widely used visual icons in the country and as a symbol of the Dutch language. In fact, it's an acronym for the Kuinkaart ("cross key") and is called "crystallin", because of its shape and crystal like glitter. The initials refer to the language association Kuinkaart Nederland and the cut off part of a Dutch coin. The visual identities of the different currencies of the Netherlands before the introduction of the euro in 2001. 1955-1960 Before the introduction of the euro, the pre-euro banknotes were printed by De La Rue printers, and had the following pictures as visual identity: 1961-1979 As the new decimal currency, the new coins and notes were designed by the Finnish artist Ida Pääbo (1908-1997) and the Dutch artist Bertel Cremer (1911-1985). The coins would be engraved by De La Rue, while the banknotes were engraved by Ernst Slakter's- en Werfkamer. 1900-2000 These notes were issued from March 1994 to April 2000 for the new basic-banknotes series, and later on, 2000 until 2001 for the additional 1 guilder and 2 guilder banknotes. But yet again the banknotes are engraved by Ernst Slakter's- en Werfkamer and De La Rue. 1989/2000 The new euro banknotes were designed by the Dutch artist Winy Maas (born 1946), who was inspired by the European euro coins (first issues), as well as by the Dutch coins of past years. These changes included, new shapes, new borders, new colours, and an obvious change of style. 2001 The introduction of the euro banknotes is since 2001 known as the «Deelnemersgroep» (Group of participants) and was done in cooperation with the Ministry of Culture and the Bank of the Netherlands.
