Sinhala Wal Akka. is it possible to read katha sinhala wewa nguci? A: (I don't speak Sinhala, so I don't know the exact term for "proper noun" -- and if someone does happen to know it, they're more than welcome to comment.) "nguci" is an adjective which means "proper, proper noun or proper title." It can be used for both people and non-people, including proper nouns. You can say "abhathiya nguci" for example, meaning "the current President of Sri Lanka." "numin mada nguci" means "title/proper name of a number" and "adurakthiya nguci" means "a particular kind of properly name noun" -- in this case, "gondi" or "renta" (which are used as proper nouns in Sinhala). So you may need to do two things. First, you probably want a way to split it apart and give it to the reader, either on the first line or the second, something like "Sinhala Wal Katha Mamai Wela Akkai Puthai." Second, you probably need to decide what the noun you want to be the "numin" or "numin mada" is. I'm guessing you want to parse it into two nouns, so "Sinhala" and "Wal Katha" but from the context I'm not sure if you mean "Wal Katha" is a noun or a proper noun. If you mean it is a noun then you probably want to add "Akkai" before the name of it. If you mean it is a proper noun, then you probably want 0cc13bf012
