I am doing an online quiz which can be saved, modified and graded. So far the quiz page has 2 textboxes, 1 for entering the question and another for entering the answer. There is an option for changing the order of the quiz, an option for modifying the quiz question and a button which says save. Now when a user clicks on the save button, I need to load a set of data (one set for every quiz version) into the database. I am using a webservice to fetch the data. The problem is, I am not sure how to dynamically generate a new quiz version (which is only a 1.2.3 version) and use it to call the same ajax

"News Flash 500" is a very fast, always-up-to-date newsreader that you can install and use on your PC or MAC. It allows you to get the latest stories from 500 different major news sources. The application can be extended with RSS subscriptions and choices of "Favorites" and "New" folders. Important note: The developer states that this is not a "clone" of the iPhone "Newsstand", but is meant to "work" with the iPhone "Newsstand" application, and as a result is a separate application. IMPORTANT NOTICES:  You may find "News Flash 500" to update the categories slowly because it is a standalone application.  The application will ask to add categories, a small "question mark" is present by each category after the application is installed.  The developer states that this application will work with iOS 3.0 or later.  iOS 4.x requires this application to have root access to the device.  The developer states that you are not required to pay for Apple iTunes subscriptions. News Flash 500 Standalone Application supports Device-to-PC syncing via iTunes. News Flash 500 Standalone Application price: \$24.99 To obtain the price of the application, please register for the developer's newsletter (see Updates). Registration for the newsletter will occur immediately after the application is purchased. The price for the newsletter registration will be shown in your purchases history. You may choose to receive the newsletter or cancel. What's new in v1.2.1:  User-friendly, full-screen mode of operation  Much easier to use option to select city or continent  Improved auto-update feature for option to check for updates automatically  Ability to have seven items in the favorites folder  Ability to mark items in the favorites folder as unread  Ability to assign a pictures folder to the favorites folder  Ability to select folder types (eg: plain text, HTML)  Ability to filter news titles (see Updates) \* An FAQ is available for your convenience. Data Quality is no longer needed, since we can now successfully link Facebook profile to iPhone.  Ability to un-check Facebook account in future Upgrade to iOS 4.0 or later
