
Xactimate 25 1 64 Bit FULL Version 35 !!EXCLUSIVE!!

For some reason my reports run off the roof and have no containment. When i redo the report to normal size (which is on the side of the report itself) it works fine but i get this very large box shadow that takes up the whole of the Xactimate window. No idea why. Front UI does not seem affected. Screen shot below. This is a screenshot of a problem i have been getting with my xactimate software on a trial version. If any one has a problem similar to this it is an issue within xactimate. I cannot fix it and there isnt much on google to help in fixing it. The follow actions did not work to fix the issue. I have been trying to install Xactimate on a Mac. My first attempt was my screen is all jacked and on a second try the xactimate window came on the screen but nothing was on it. Tried again and got the same. I called in Xactimate tech, and it just did not seem to want to run on the Mac. My Mac has two screens with a 22" screen and a 27" monitor. I tried to set both screens to mirror, but they would not stay mirror. So I unplugged the 22" screen, and that did not help. I made the 27" monitor the primary screen, and now it lets the 22" screen be mirrored. My macbook pro is a 2015 16GB. This Mac runs MacOS Sierra. id. at 1148; see also Sheahan, 2019 U.S. Dist. LEXIS 110800, at *330 ("Other agents with whom [State Farm] engaged take several days to perform their calculations with Xactimate after they receive the inspection report."). Indeed, Xactimate has "a built-in calculation engine to recalculate estimates." (Id.) Because the roof data is uploaded into the Xactimate system in hours or days instead of weeks or months, insurers save time and money.
